To Our Friends and Patrons:

We trust that you will find much to interest you in this, our 1920 catalogue of Roses and other beautiful flowers. It offers the very best the world affords in flowering and ornamental plants for the decoration of your home and garden. Inferior varieties get no space at our nurseries. Only the most meritorious of each family of plants are grown.

OREGON GROWN PLANTS—We have prepared for this season’s trade the usual large and fine stock of Oregon-grown plants, such as we have been sending our customers for years. The fact that we send out such fine, large, healthy plants, which always reach their destination in a perfectly fresh condition, no doubt accounts for their popularity with flower-loving people in every nook and corner of the Pacific Northwest. As it is scarcely a day’s journey to any point on a railway line, it is obviously certain that it is a great advantage to buy from us in preference to sending to an Eastern florist and having to wait ten days or more before receiving the plants, and then only in a wilted and spoiled condition.

OUR YOUNG ROSES—To those persons who have never bought our roses we desire to inform them that our small low-priced plants are greenhouse-grown; now established in three-inch pots and having been grown in a cool temperature are ready to break into growth when planted in the open. They should not be put out until settled spring weather is assured usually after April 1.

OUR TWO-YEAR-OLD ROSES—These are field grown dormant plants with good roots and several strong canes which before shipment we prune back to 18 to 24 inches in height. These roses should be planted early in the spring or in the fall.

OUR PRICES—While it is true that we are not seeking a reputation for cheapness, we know that our prices are as low as good plants can be sold for and that no firm in our line of business is supplying stock equal to ours for less money.

METHOD OF SHIPMENT—As a rule small orders can be sent more economically by parcel post while orders for amounts over two dollars will go by express to better advantage. Two-year-old roses, shrubs and vines being quite heavy and bulky are sent only by express at expense of purchaser.

PARCEL POST SHIPMENTS—Orders for small plants of all kinds will be sent by parcel post when requested by purchaser. Also small orders of larger plants when such is possible. It is quite obvious that our proximity to all points in Oregon, Washington and Idaho is a distinct advantage to us and our customers under the parcel post zone rates. Many of the larger and higher priced plants are too bulky to send by parcel post. We reserve the right to send orders containing such by express at the expense of purchaser.

EXPRESS SHIPMENTS—We recommend this method of shipment when the order is of an amount over $3.00. Such shipments receive more careful handling and safe delivery is guaranteed in all instances. By this method of shipment we are able to leave all the earth upon the roots of the plants, which will enable them to grow more readily when planted. We always select the very largest plants our stock affords when making shipment in this manner. The customer pays the charges upon delivery of the plants but we always add extras sufficient in value to reimburse him. Express charges are very reasonable to all points in the Pacific Northwest as compared with the same from eastern points.

TERMS STRICTLY CASH—Every article in our catalogue is priced, therefore purchasers must know their cost when making out their order. The prices are fixed on a cash basis and as our customers for the most part are unknown to us and as we do not have a system of bookkeeping, our terms are strictly cash with the order.

OUR GUARANTEE—We guarantee all seeds, bulbs and plants true to name to the extent that we will replace any which may through error prove otherwise. We likewise guarantee safe delivery of all seeds, bulbs and plants.

REMITTANCES—Send money by bank draft, postoffice or express money-order. Personal checks on local banks only accepted when 10 cents is added for exchange. Postage stamps will be accepted for small amounts.

C. O. D. ORDERS—Plants ordered by express C. O. D. will be forwarded promptly, purchaser paying all charges.

SMALL ORDERS—No plant orders filled for less amount than 50 cents.

OUR NURSERIES—Are situated at Clarke’s Station on the Mount Scott car line. Visitors welcome during business hours.

Location of Beds.—Roses should be planted where they will be open to sunlight for at least half of each day. In locating beds, avoid trees, shrubbery and shady sides of buildings and fences. This will lessen the danger from insects and diseases.

Soil.—Any good garden soil, which will grow good vegetables, will grow, with proper fertilization, fine Roses. The ideal soil is a clay loam of sufficient porosity to permit of ready drainage.

Preparation of Beds.—The beds should not be so large that the Roses cannot be reached without treading among them. Long, narrow beds, with one continuous row of plants, are preferable. Spade the soil to a good depth, mixing in well-rotted stable manure as you do so. Cow manure is considered the best, though well-rotted horse manure will do. Bone meal is also excellent.

Planting.—Most varieties should be planted about 2½ feet apart, when the soil is in a nice, mellow condition. Spread the roots out well and press the soil down firmly. Plant deeper than previously grown and give one good watering if weather is warm and dry.

Watering.—Most people water their Roses too much. Once a week is often enough, and that early in the morning. Keep the soil mulched or cultivated around the bushes to prevent baking.

Mulching and Protection.—Only the tenderest varieties need any protection in this country. This can be best supplied by mulching the soil around the plants with a heavy application of cow manure, which should be spaded in the following Spring. All plants should have this mulching.

Pruning.—Field-grown dormant Roses should be cut back severely when first set out. Subsequent prunings should be attended to in late Winter and early Spring, when all dead and weak growth should be removed entirely and the strong, live canes shortened back to one or two feet in length, according to the growth of the previous season. It may be accepted as a general rule that weak growth should be pruned severely and strong ones sparingly. Climbing Roses should not be cut back any more than is necessary to keep the plant in a shapely appearance.

Best Time for Planting.—No question is asked more frequently than, “When is the best time to plant Roses?” Our dormant field-grown Roses can be planted any time that the soil can be worked, between October and April. Probably the best month is March. Most people plant in that month, and with best results. Our small greenhouse-grown Roses should not be planted until a month later, when the soil has warmed up with the increasing strength of the sun’s rays.

DISEASES AND INSECTS

Healthy, vigorous, well-cultivated Roses in well-located beds are less liable to the ravages of insects and diseases than weak specimens of slender growth and poor vitality. Therefore, keep your Roses healthy by good cultivation. It is the indifferent, indolent grower whose Roses are the prey for insects, although the weather in certain seasons aggravates the troubles of a Rose grower considerably.

Mildew.—This is a fungus disease, shown by the grayish, wrinkled and mouldy appearance of the foliage caused chiefly by cool nights and hot days. Remedy: Dust lightly over the foliage flour of sulphur on a warm, sunny day.

Black Spot.—Another fungus disease, usually making its appearance on Hybrid and Hybrid Tea Roses late in the season. The black spots on the foliage cause same to turn yellow and drop off. Pick off affected leaves and spray with “Bordeaux Mixture.” Spray also when dormant the following Spring.

Aphis or Green Fly.—A little sucking, green insect, which sometimes gather in countless numbers upon the new growth. Steep tobacco stems or leaves in water over night and apply with a spray pump or whisk broom. Warm soap suds is also effective.
NEW EVERBLOOMING ROSE GOLDEN EMBLEM

EVERBLOOMING ROSE NOVELTIES

Owing to the U. S. Government regulation, Quarantine Law No. 37, which went into effect June 1, 1919, it is no longer possible to import roses from Europe for immediate sale. We however are permitted to import new varieties for propagating purposes only. It is therefore possible to offer this spring only young greenhouse grown plants of newly imported varieties such as we present on this page of our catalogue. As heretofore we shall strive to keep well to the front in the matter of offering choice novelties in roses.

Columbia is a giant in growth, with magnificent dark green foliage absolutely free from mildew in any location. The flowers are a bright rose pink of glistening freshness, immense in size and of elegant form. They are produced on long stout canes high above the body of the plant. Needs very little disbudding. This rose has been growing on trial in the Portland Test Gardens, the Pacific Coast trial grounds of the American Rose Society. Three most capable judges who have been scoring some seventy new varieties planted in the Test Garden have just given Columbia the highest award for the year 1919. It will receive the Gold Medal of the American Rose Society.

Price: Young Plants, 75 cents each; 2-year-old plants, $2.00 each.
NEW EVERBLOOMING ROSE—OREGON OPHELIA

Undoubtedly the most popular cut flower rose of the time is Ophelia, offered elsewhere in this catalogue. Its beautifully shaped buds on the very long stems has placed it in the very front rank as a forcing rose and it is also a fine garden rose. In this fine new rose we are offering a variety produced in our own nurseries. As its name implies, it is a double form of the older variety and in our estimation very superior for growing in the open ground. It has twice the petalage of Ophelia, quite as beautiful in bud state and far superior in the open flower, keeping nearly twice as long and much larger in size. It is also most distinct in color, the various shades of copper and rose, being intensified greatly in the new variety and is indeed one of the richest colored varieties we have yet seen. This new rose scored very high in the Test Garden of the American Rose Society at Portland the past season.

Young plants, 75 cents each. Two-year-old plants, $2.00 each.
NEW EVERBLOOMING ROSE LOS ANGELES

The passing of another season has served to confirm our opinion regarding the merits of this fine new American pedigreed rose. It is making friends for itself in every section of the country and the demand is so great that no reduction in the price will be made this year. Won the coveted Grand Prize in the trials at Bagatelle Gardens, Paris, during the past summer with many of Europe's finest roses in competition. Los Angeles belongs to the Hybrid Briar class of roses in which we have such fine sorts as Lyon, Madame Eduoard Herriot and Rayon de Or. We were greatly impressed with it when we first saw it growing in the originator's gardens. The buds are long and pointed expanding into a flower of fine size and form. The color is a luminous flame pink toned with coral and shaded golden yellow at the base of petals. Its intensely rich coloring together with the heavy texture of the petals keeps each flower handsome for a remarkable long time. One of the features of this rose is its strong tea-rose fragrance. And last but not least it is a fine, strong grower throwing up stout canes of fine length and strong lateral growth, all of which gives a profusion of bloom hardly equaled by any variety in cultivation. A garden and exhibition rose of the highest degree of merit.

Strong Field Grown Plants, $1.50 each.

MODERN ROSES OF PROVED MERIT

When a new rose reaches us from the introducer a part of the stock is immediately planted in our testing grounds to ascertain its possibilities as to quality of bloom and productiveness. All the sorts on this and the following page have stood our test and we are cataloguing them in the belief that they will all become generally well known varieties. As our heading states they are modern roses of proved merit.

Lady Hillingdon—Deep apricot yellow long and pointed bud, a fine forcing or garden rose, excellent for cutting. Flowers are of good quality, very lasting and foliage handsome and luxuriant. Lady Hillingdon is considered the best decorative rose in its class. This aristocratic beauty is a seedling from Papa Gontier and Madame Hoste, and was the recipient of several Gold Medals at English Rose Shows.

Madame Edouard Herriot—This fine garden and exhibition rose is the product of the skill of that peer of rosarians, M. Pernet Duchere, of Lyons, France, who is now mourning the loss of his two sons on the field of battle. M. Duchere has given us many of the finest roses in existence, including Caroline Testout, Melanie Soupert, Lyon and Rayon de Or. This fine sort is of strong vigorous growth and spreading habit with thorny light green canes beautifully furnished with bright green leaves. The buds are long and pointed, of a deep coral red color shaded to orange yellow at the base of petals. Opens into a finely formed flower of wonderful shade of rosy scarlet flushed with shrimp and apricot tints. One enthusiast describes the coloring by saying it is as sunshine on burnished copper.

Madame Melanie Soupert—A superb fancy everblooming rose of strong vigorous growth and free branching habit. Color golden yellow shaded to orange yellow at base of petals, the whole beautifully flushed with orange-pink. Fine long pointed buds of elegant outline opening into a very large fluffy flower of great beauty.

Mrs. Aaron Ward—One of the most delightful roses of recent years in a color that catches the eye at once—a deep golden orange color shading out to lemon or creamy-yellow at the edge of the petals. Some describe the rose as an Indian yellow. The buds are cupped and very deep, showing the glowing heart to the best advantage.

Mrs. Arthur Waddell—A strong rampant-growing Hybrid Tea Rose, with foliage that is ornamental in itself. Large long pointed buds of a bright rosy scarlet opening into a finely formed flower of a rich apricot or salmon color. An exhibition and garden rose of the highest rank. Raised by the famous French hybridizer, M. Fernet-Duchere.

This fine novelty is remarkable for its strong upright growth, handsome leathery foliage and the exquisite coloring of its beautifully formed buds and flowers. The color is a delicate salmon, petals prettily edged with rose while the center of the flower is a rich mingling of orange and copper shades. It is so entirely distinct in color from all other varieties as to readily be identified among any number of roses. The most popular cut flower variety of the present time, the blooms being in great demand in every section of the country.

Sunburst—A veritable giant among yellow roses, throwing up heavy canes clothed with most ornamental foliage and crowned with glorious buds and flowers. The buds are very long and of most beautiful form opening into a gorgeous colored flower. The color is a rich cadmium-yellow shaded with orange and copper. One of the very finest yellow roses yet raised. Comes from the eminent French rosarian M. Pernet Duchere who has given us a number of fine new yellow roses of late years.

TREE OR STANDARD ROSES

As can be seen by the accompanying cut, Tree or Standard Roses are stately objects for lawn or for interspersing among other plants in the hardy border. They are produced by grafting buds or eyes of various sorts upon stout canes of a wild rose. By cultivating several seasons, they produce large heads of growth and bloom quite profusely as bush roses. In fact, many sorts produce finer flowers upon standards than on ground roots. These roses lend themselves handsomely to planting in rows along walks or fences. Our stock this year has extra heavy heads, standing 4 to 5 feet from the ground. We grow only a few of the best varieties in this class. Being quite bulky and heavy, these roses must be forwarded by express. We offer the following fine sorts:

Clio—Vigorous growth; large handsome foliage; flowers flesh color, shaded in the center with rosy pink, very large, fine globular form and freely produced.

Conrad F. Meyer—A most valuable addition to the list of hardy free-blowing roses. The color is a beautiful pure silvery pink. It is of ironclad hardiness. Its beautiful foliage alone would recommend it as an ornamental shrub for the garden, while the flower is its crowning glory.

General Jacqueminot—Bright shining crimson, very rich and velvety, exceedingly brilliant and handsome, makes magnificent buds, and is highly esteemed as one of the best and most desirable.

Hugh Dickson—This superb new Irish Rose stands in the front rank as a producer of the very finest brilliant crimson-scarlet roses. Of strong, vigorous growth and free-flowing habits, this great Hybrid Perpetual Rose is bound to become one of our most favorite varieties.

Margaret Dickson—Large flowers, elegantly formed and well presented on long, stiff stems, pure white with pale flesh center and magnolia fragrance.

Mrs. G. J. Sharman Crawford—Clear silvery pink; large and full of beautiful cupped form and produced in great profusion, every shoot being crowned with a flower bud; foliage handsome and habit unusually good.

Mrs. John Laing—Very free-flowering, commencing to bloom early in the season and continuing to bloom profusely until late Autumn; color, soft, delicate pink with a satiny tinge.

Paul Neyron—Deep, shining rose, double and handsomely formed; blooms freely, and is unusually strong and vigorous; the largest variety in existence and one of the most desirable for the garden.

Prince Camille de Rohan—Very dark rich velvety crimson, passing to intense maroon, shaded black, one of the darkest roses and very handsome; regarded as the best of its color.

Ulrich Brunner—This is really a magnificent rose; extra large bold flowers, full and globular; petals large and of a good substance; color, rich glowing crimson, elegantly flamed with scarlet; a good grower and free bloomer.
**INDEX TO OUR TWO-YEAR-OLD ROSES**

On this page we give an alphabetical list of all the roses we have to offer in two-year-old size, together with the prices of same and the prices in our catalogue on which they will be found, described. Remember that our two-year-old roses are held grown, with strong, heavy branches and ample roots. They must not be confused with the so-called two-year-old pot grown roses as sold by Eastern florists.

GLADIOLI

The most satisfactory, desirable and popular of all garden bulbs. Nothing else that we know of costs so little and grows and blooms so readily in any soil or climate. They grow and bloom readily with but little care or attention and make a display in the garden unequaled by any other bulbous flower. Gladioli are of the simplified culture. Can be planted at any time from March to June, either in beds by themselves or among your roses and shrubs. Our bulbs are of the first size only and every one will bloom the first season. We offer two fine collections of named varieties which include the very best and most distinct sorts in commerce. Our mixed Gladioli are likewise first size bulbs and will bloom quite as freely as the named sorts.

HARDY FLOWERING AND ORNAMENTAL SHRUBS

A few hardy shrubs are a necessity in the ornamentation of any lawn or garden planted either as single specimens, in groups, or along fences. The time of blossoming of the different sorts extends over the whole season, though the greatest show is in the Spring and early Summer.

At the prices given we send large, well-branched bushes from two to five years old, grown in the open ground. As our shrubs are for the most part large and heavy, we usually send them by express or freight; however, small orders can be sent by Parcel Post if purchaser requests it.

It produces long straight slender branches which terminate in long spikes of lillac-like flowers of a beautiful shade of lavender blue. So free is its growth that a single plant will often produce fifty fine flower spikes the first season after planting. Commences to bloom in June and continues until frost nips the flowers off. **RHODODENDRONS**

This wherever known is universally acknowledged to be the most showy, magnificent, hardy evergreen shrub that grows. It will thrive in any good soil without any special preparation, and in the full blaze of the sun, but it is more luxuriant in good, well prepared soil of leaf mold and muck and peat mixed and in partial shade. The broad, thick, evergreen foliage, with its glossy richness, would alone entitle it to a place foremost in the rank of evergreen shrubs, but when, in June, this mass of luxuriant foliage is almost hidden by the magnificent array of beautiful flowers in all colors from white to purple, the effect is simply grand. The plants we offer are strong and bushy, well set with flower buds, and will flower nicely the first year. Choice named sorts, $2.50 to $4.00 each.

JAPANESE CHRYSANTHEMUMS

The Japanese Chrysanthemum is without doubt the finest Fall blooming plant we have and has been aptly named "Queen of Autumn." Immense strides have been made of late years in hybridisation, and the latest novelities are remarkable object lessons of the potency of cross breeding. No family of plants present such a wide range of colors or more diversified forms. Nor does any respond more readily to liberal cultivation than the Chrysanthemum. In fact, they require considerable attention to give best results. They should be cultivated, watered, staked and tied and, most important of all, a good part of the buds should be removed when they first appear. This will insure large, perfect flowers and give planters a greater degree of satisfaction. Our collection includes all the finest new sorts which have come under our observation and which we think will give utmost satisfaction.
